

RED HAT CONSULTING STRATEGIC MIGRATION PLANNING SERVICE

JBoss ENTERPRISE APPLICATION PLATFORM

OPEN SOURCE FOR THE ENTERPRISE

IT organizations are constantly challenged to produce high-quality solutions with a lower total cost of ownership (TCO). The industry now recognizes that open source software provides stable, high-quality solutions, and migrations of existing enterprise applications to products such as JBoss® Enterprise Application Platform have become increasingly popular.

The JBoss Enterprise Application Platform provides a holistic solution, including tools that solve business challenges like process management, enterprise application integration, and the creation of service-oriented architectures (SOA), enterprise portals, and data services solutions.

A successful and smooth migration to JBoss requires a strategic level of up-front planning and a proper understanding of the issues and challenges involved. A proper migration plan will minimize migration risks and costs. To guide you through the migration process, Red Hat Consulting offers its Strategic Migration Planning Service, developed by Red Hat's global team of enterprise architects. This offering provides the tools, insight, and proven processes needed to proactively plan and execute a migration to JBoss® Enterprise Application Platform. The result? Faster time to production and maximum knowledge-transfer with minimal disruption.

STRATEGIC MIGRATION PLANNING PROCESS

Strategic Migration Planning from Red Hat Consulting combines product expertise with proven methodologies based on years of experience that achieve safe and efficient migrations to the JBoss Enterprise Application Platform. The duration of the engagement is based on your specific business requirements, with most spanning two to six months. During the engagement, a Red Hat enterprise architect with deep product expertise will work with you to define a streamlined migration strategy.

Red Hat has designed a five-step process proven to identify migration opportunities, examine the risks associated with various migration scenarios, create a standard enterprise environment, and develop a comprehensive and strategic migration plan for the enterprise.

THE VALUE OF A TRUSTED ADVISOR ON YOUR SIDE

Red Hat Enterprise Consulting Services provides the expertise and knowledge transfer to help your organization realize value more quickly with an optimized migration process. By engaging Red Hat Consulting Services, you benefit from years of experience in the design and deployment of Java-based middleware on both open-source and closed-source software platforms. This expertise in closed-source middleware platforms helps Red Hat Consulting quickly identify and overcome any potential risks and hidden costs of porting applications within your portfolio to the JBoss platform.

Red Hat Consulting has unique expertise with the JBoss Platform that helps ensure that your migration results in applications that are designed to work with the current version of the JBoss platform, as well as any versions in the future.

SCOPE:

A Red Hat consultant will work with you to:

- Examine the existing application server and platform and determine the equivalent capabilities in a JBoss EAP ecosystem
- Examine proprietary features and native capabilities and determine the equivalent capabilities in JBoss EAP
- Measure organizational readiness and overall migration risk
- Develop a strategic migration plan, including a detailed roadmap and cost estimate
- Implement the strategic migration plan and employ implementation support strategies

REQUIREMENTS

To ensure the best experience, the following individuals from your organization should be available to work with the consultant during the engagement:

- **Sponsor:** Provides guidance, acts as an escalation point – should one be necessary – and is your ultimate sign-off authority for consulting engagements
- **Project manager:** Manages the day-to-day activities related to this engagement, and ensures the timely delivery of information required for the project
- **IT and other staff:** Provides Red Hat with relevant and necessary information about your IT infrastructure

GET STARTED

Migrations are multi-faceted. And since no two migrations are ever the same, understanding your organization's readiness and current assets is critical. To get you started, Red Hat offers its comprehensive JBoss Strategic Migration Planning Guide. This guide details the recommended process for moving to JBoss EAP, including the planning steps that should be taken when preparing for such a migration, as well as common implementation and training standards and best practices.
